
Quick Reference for File Prep

To upload files:

Go to www.aproofnow.com

(Fill out all the fields to ensure your Tech Support Rep will receive your artwork.)

Accepted file Formats:

Adobe Photoshop:

- Send in at final size if possible
- Layer the file if color match is needed
- File formats: psd, tiff, eps

Adobe Illustrator:

- Include a separate file or support file for every placed image
- Text should be sent in outline or vector
- File formats: ai, eps

Adobe Indesign:

- Include a separate file or support file for every placed image
- Include all fonts or convert the text to outline
- File formats: indd, inx

File size: Send in files at final size when possible. If you cannot, make sure it can scale proportionately to the final dimensions or that the DPI falls to a high resolution at final size.

Resolution Formula:

Width of final graphic (inches)

Width of original (inches) x Desired resolution (PPI)

More tips:

Sending instruction PDF's (low resolution files) in with your art files will let us know what the final product needs to be and will reassure your Tech Support Rep of the final print.

Files need to be sent in at a DPI of 100 or higher at the final file size.

Critical color matches like Pantone colors need to be specifically called out in the file or by email or some other form of written instructions.
