Retractable Bannerstand Set-up Instructions

back of unit showing mast support

Set-up Instructions

1. Rotate foot at center bottom of unit outward until it clicks into place. The support foot will be perpendicular to unit.
2. Adjust mast height and place into hole of mast support at back center of unit.
3. Raise graphic and hook header bar of graphic onto top of mast clip (A). The smaller clip above (B) is for the optional light. *Note: graphic clip (A) is shaped like a keystone that slips into notch on header bar*
4. Adjust mast height to create tension and tighten twist lock if necessary
5. To break down repeat steps in reverse

**Twist locks on mast require only a quarter turn to tighten.
Damage will result if overtightened**
